Setting up TruVision Navigator for CCTV Remote Viewing

1. Ensure you have the latest version of TruVision Navigator downloaded on your computer:

**Windows Computer:**
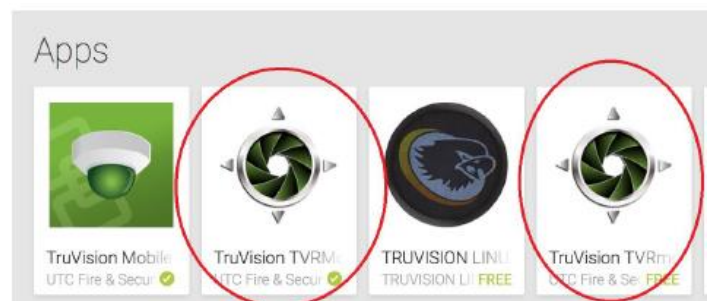

http://www.interlogix.com/video/product/truvision-navigator-v7

Click on 'downloads' and then on 'TruVision Navigator 7.0 Software'

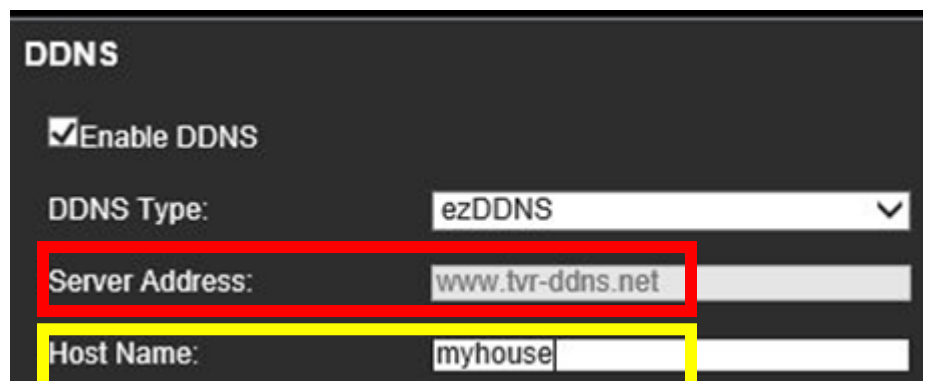

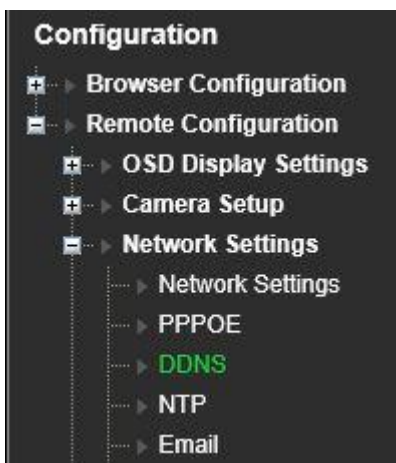

Apple Devices (*note: HD is for tablets only***):**

Android Devices (*note: HD is for tablets only***):**

2. Access the DDNS information on your NVR under "configuration"

3. The Server Address + Host Name is the URL to be entered in the remote computer or device. From the example listed in step 2, it would be **www.tvr-ddns.net/myhouse**

Apple Device

Windows Computer

4. You are now setup to remotely view your CCTV system. Should you require additional assistance, please contact our Service Team to schedule a technician to assist you in setting this up.
